7-8 NOVEMBER 2024

DEPARTMENT OF ARCHITECTURE – DA
Alma Mater Studiorum University of Bologna
Flaminia Foundation
Under the patronage of ISTEA – Italian Society of Science, Technology and Engineering of Architecture

WORKSHOP PRESENTATION

CMW WORKSHOPS

Ravenna CMW workshops are forums for presentations of latest valuable research-based knowledge and developments that are touching **construction management**. The mission of these workshops is to provide steppingstones for further advancements of construction management with the innovations, breakthrough results and discussions. The CMW 24 is the third edition of the workshop, after the ones of 2013 and 2018.

CONSTRUCTION PROCESS SUSTAINABILITY

Sustainability perspectives of the building construction process, according to recent theories addressing **circular economy**, propose new research and development topics for the construction sector, particularly for **Construction Project Management**. Managing the building construction process remains of central importance for both environmental and economic sustainability, and for the growth of the construction sector which, also due to recent global instability, is looking for a **new identity and production framework**.

CALL FOR PAPER & WORKSHOP PROCEEDINGS

We welcome papers on construction management. Follow the link below to find topics, instructions and important dates. Official language of the workshop is English. The workshop proceedings will be published in a scientific open access publication.
